

Student Data Analysis

A comprehensive review of student demographics, academic distribution, and financial health based on current dashboard metrics.

Executive Overview

4,696

Total Students Enrolled

A robust student body spread across 4 primary academic levels and diverse geographic backgrounds.

₦69.35K

Average Monthly Allowance

Overall baseline allowance across the entire population, indicating standard living capacities.

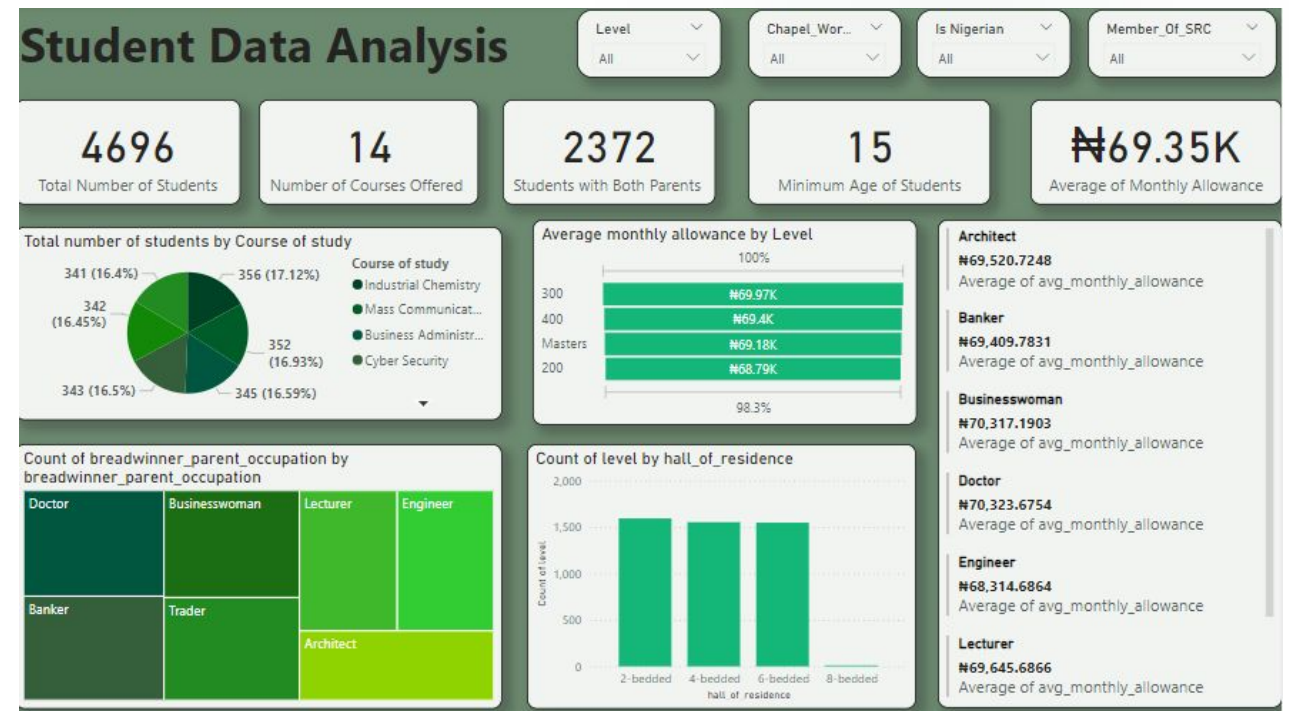

14

Courses Offered

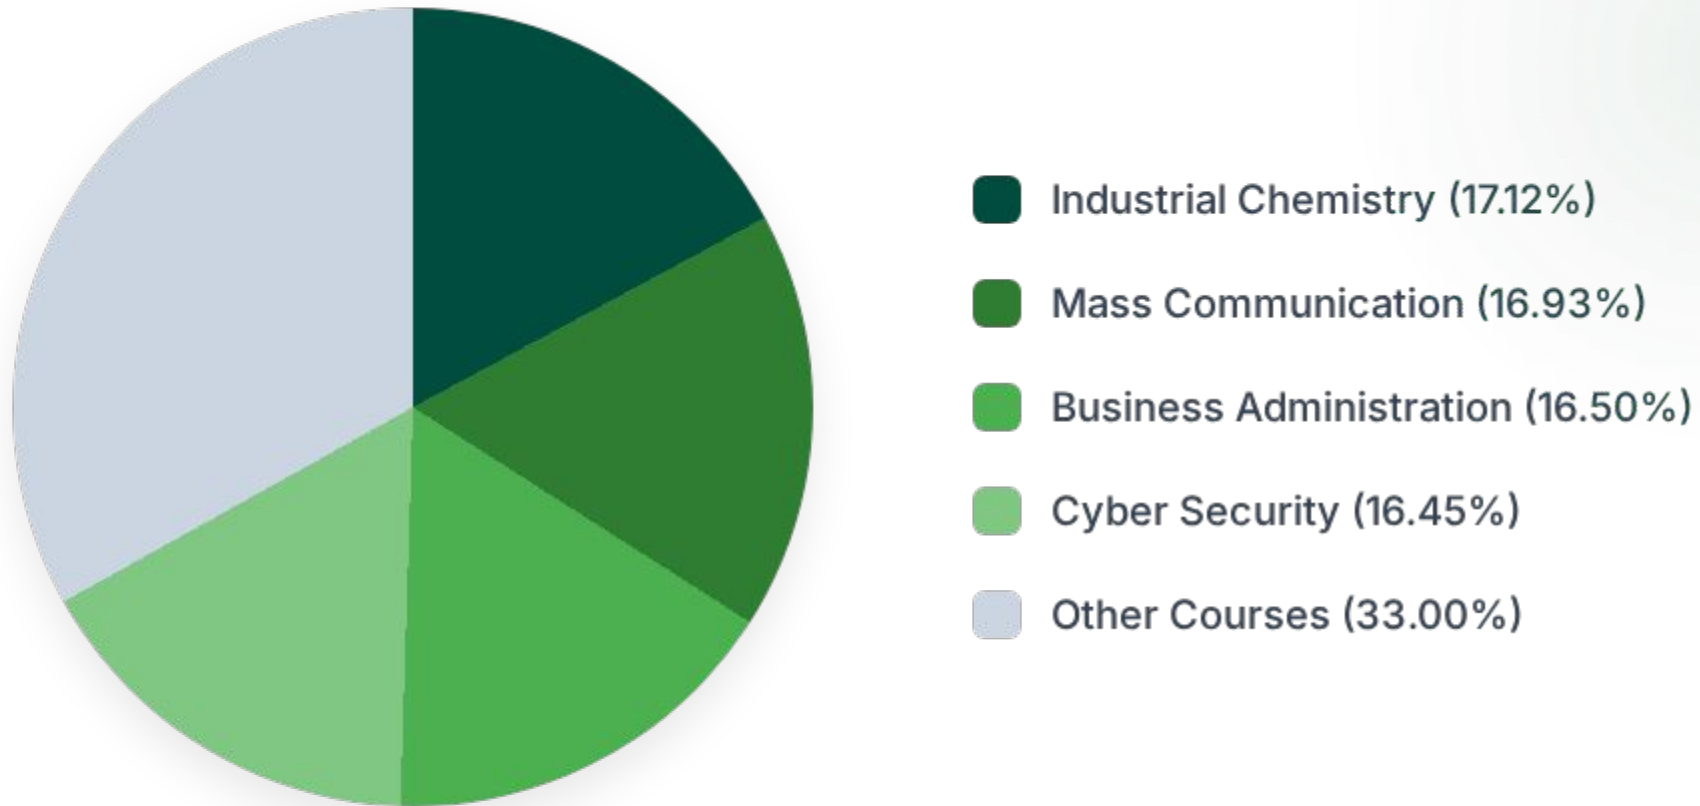

Well-distributed academic programs, with top courses maintaining highly balanced enrollment figures.

General Demographics & Academics

- **Balanced Course Distribution:** Enrollment across top courses like Industrial Chemistry, Mass Comm, and Cyber Security is perfectly distributed at roughly 16.5% - 17.1% each.
- **Accommodation Preferences:** The vast majority of students reside in 2-bedded, 4-bedded, and 6-bedded halls, with nearly identical headcounts (~1,500) in each tier.
- **Parental Backgrounds:** A significant portion of the student body (2,372) has both parents present, with primary breadwinners spanning across top professions like Doctors, Bankers, and Businesswomen.

Academic Enrollment Parity

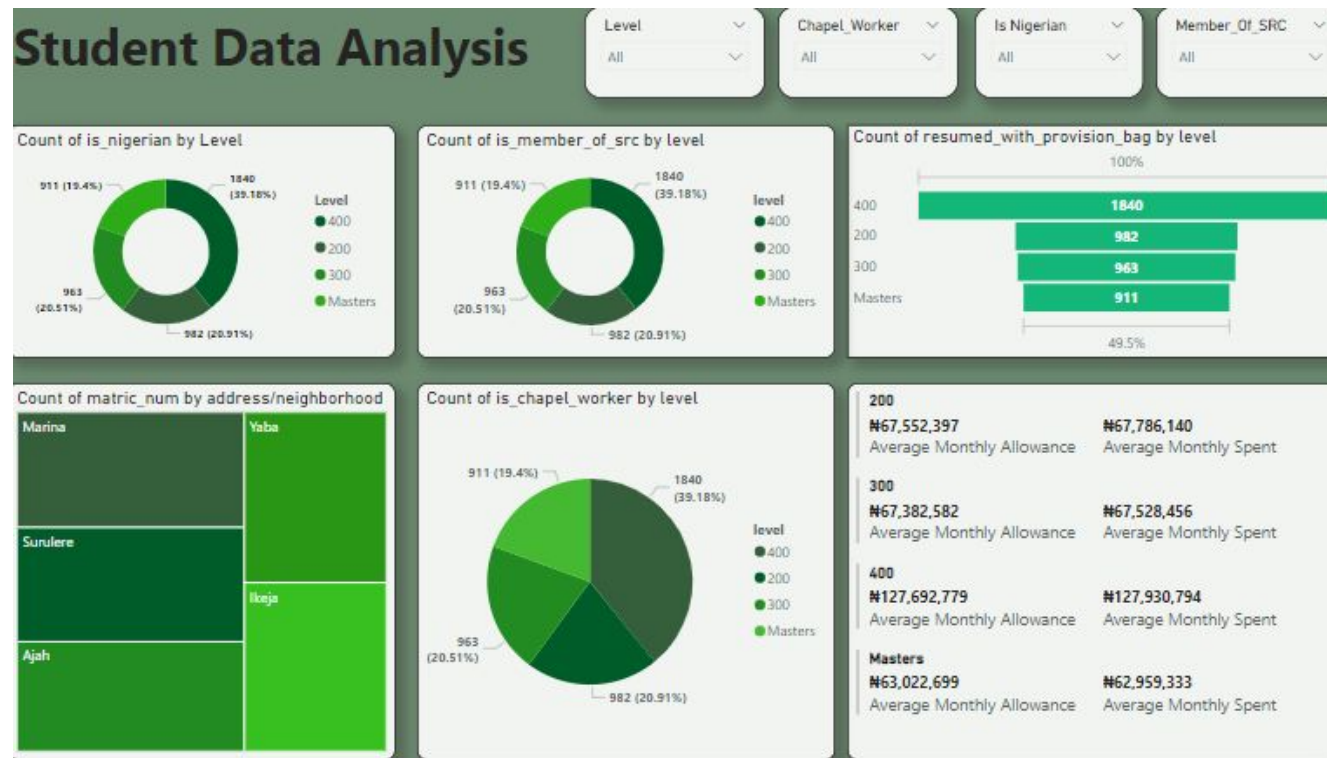

The institution exhibits remarkable parity across its top 4 faculties, ensuring balanced resource allocation and preventing departmental overcrowding.

Average Monthly Allowance by Level

Despite variances in enrollment size, the average monthly allowance remains remarkably consistent across all academic levels, hovering closely around N69,000.

Level-Based Demographics & Locations

- **400 Level Dominance:** The 400-level cohort represents the largest singular block (39.18% / 1,840 students) across multiple demographic filters including nationality, SRC membership, and Chapel work.
- **Geographic Spread:** Student matriculation traces back heavily to key urban neighborhoods, specifically Marina, Surulere, and Ajah.
- **Campus Preparedness:** Funnel data shows a direct correlation between academic level and provisions, with 400-level students bringing the most provision bags (1,840).

Accommodation & Geography

Halls of Residence Distribution

The student population is distributed almost completely evenly across the primary housing options provided by the institution.

- **2-Bedded Rooms:** 1,594 students
- **4-Bedded Rooms:** 1,553 students
- **6-Bedded Rooms:** 1,548 students

Top Residential Neighborhoods

Based on matriculation data cross-referenced with regional geography, the student body primarily originates from the following key districts:

- Marina
- Surulere
- Ajah
- Yaba
- Ikeja

Financial Activity by Academic Level

Academic Level	Avg. Monthly Allowance	Avg. Monthly Spent	Variance / Delta
200 Level	₦ 67,552	₦ 67,786	- ₦ 234 (Deficit)
300 Level	₦ 67,382	₦ 67,528	- ₦ 146 (Deficit)
400 Level	₦ 127,692	₦ 127,930	- ₦ 238 (Deficit)
Masters	₦ 63,022	₦ 62,959	+ ₦ 63 (Surplus)

**Note: Data highlights a significant financial spike for 400 Level students, whose average allowances and expenditures are nearly double those of other levels. Across most undergraduate levels, students operate at a slight monthly deficit.*

Strategic Takeaways

- **Targeted Campus Services:** Because the 400-level demographic is nearly 40% of the active student base and possesses double the spending power (~~\$~~127K+), campus retail and services should tailor premium offerings toward final-year students.
- **Financial Literacy Needs:** The data shows that 200, 300, and 400-level students all spend slightly more than their monthly allowance. Introducing campus financial literacy programs could bridge this gap.
- **Resource Allocation:** The perfectly balanced 16-17% enrollment across the top 4 courses (Industrial Chemistry, Mass Comm, Business Admin, Cyber Security) suggests that faculty funding and laboratory/studio spaces must be maintained equally to support this parity.
